Pro DSA Batch Document

Demo Document : To get full access of Document + Complete DSA + live sessions + mentorship visit

https://www.pavanxdcl.in/pavanxdcl_access_page.html

Rewards for Joining Pro-Batch:

1. One on One Guidance from Pavan Sir
2. Daily Live DSA Sessions from Pavan Sir

Welcome to the official resource document for the **Pro DSA Batch**.

Here, you'll find:
• Class recordings
• Notes & explanations
• Practice problems
• Important links

Make sure to follow the sequence and practice consistently every day to get the best results.

📌 If you're new to DSA and coding, we strongly recommend completing the **Beginner DSA Module** provided by Pavan Prakash Sir first. These sessions are not intended for beginners, so joining too early may lead to confusion or demotivation. If you're unsure about your readiness, share your current coding level with the mentor—he will guide you accordingly.

📌 If you have already completed **Rookie Rise** from PavanXDcl.in, you can skip the beginner content and start directly with the Pro Module by scrolling down.

‘
‘

Beginner DSA Module [Rookie Module]

✅ **Use Your Own Logic**

Don't copy variables or logic. Understand concepts & create your own approach.

🎯 **Extract Concepts**

Focus on core ideas, implement them your own way — not just the solution.

🤔 **Understand the "Why"**

Analyze the necessity of each part to grasp deeper algorithmic thinking.

🚀 **Prepare for Advanced**

Solid foundation here makes Pro Max-level problems easy to adapt to.

Beginner Module Start : Do it in the same Sequence , no need to hurry! calm down… slow down…
Watch… make notes… practice… master…. Only then move to the next video….
Happy Learning

Remember : God is always with you , have faith in god , good things will happen to you in the right time…just keep pushing yourself

You can pick Java or Python or JavaScript as your companion and start coding

Good to know 👍

Please watch if you are an absolute Beginner

Beginner DSA Module

Module 0 : Beginner Basics

Java Students : [The Language used in video is JavaScript but operators remain the same. so watch it **Just Ignore** ** ,!=== and !==]
https://www.youtube.com/watch?v=eUAqbFn64a0
https://www.youtube.com/watch?v=A2SV_bf0yl0

Python Students:
https://www.youtube.com/watch?v=mdlbz025jkA&feature=youtu.be

JavaScript Students:
https://www.youtube.com/watch?v=eUAqbFn64a0
https://www.youtube.com/watch?v=A2SV_bf0yl0

Module 1 : Pattern Programming

Session	Topic	Resources	Importance
Pattern-1	Basic patterns — squares, triangles, stars	Class Recording notes	**Extreme**
Pattern-2	Number patterns +	Class Recording	**Extreme**

	pyramid variations	notes	
Pattern-3	Diamond, hourglass & complex patterns	Class Recording Notes	**Extreme** Solve the Below Question1 Question2
Pattern-4	All pattern types — full revision + notes	Class Recording Notes	**Extreme**

My Notes for Pattern Programming : Click here

Before Going Forward : Solve these Patterns once **:** **click here**

Module 2 : ArrayList / List

Session	Content	Resources	Practice	Importance
AL-01	Intro Part 1 — Array basics & methods	Class Recording Notes	None	Core Concept
AL - 02	Intro Part 2 — Iteration & in-place ops	Class Recording Notes	None	Core Concept
AL - 03	Prefix Sum Array	Class Recording Notes	LeetCode Q HackerRank Q	**Extreme**
AL-04	Nested List + HackerRank challenges	Class Recording	HackerRank Q HackerRank Q	**Medium**

		Notes		
AL-05	Brute Force & Subarrays	Class Recording 1 Class Recording 2	LeetCode Q	**Critical**
AL-06	Merge Strings Alternately	Class Recording	LeetCode Q	**Critical**
AL-07	Product of Array Except Self	Class Recording	Leetcode Q	**Critical**
AL-08	Increasing Triplet Subsequence	Class Recording	LeetCode Q	**Medium**
AL -09	Can Place Flowers	Class Recording	LeetCode Q	**Medium**

Module 3 : HashMap / Dictionary (Python)

Session	Content	Resources	Practice	Importance
HM-01	Intro + Methods	Class Recording	-	**Extreme Core Concept**
HM-02	Frequency HashMap — Java & Python	Class Recording-1 Class Recording-2	LeetCode Q	**Critical**
HM-03	Identify Duplicates	Class Recording Notes	LeetCode Q LeetCode Q	**High**
HM-04	HashMap +	Class		**Critical**

	Prefix Sum (SubArray Sum = k)	Recording Notes		
HM-05	Remove Duplicates	Class Recording Notes	LeetCode Q	**Medium**
HM-06	Strings Frequency HashMap	Class Recording	LeetCode Q	**Medium**
HM-07	Kadane's Algorithm	Class Recording Notes	LeetCode Q	**Core Algorithm + Extremely Important**
HM-08	Longest SubArray (same begin/end)	Class Recording Notes	GeekForGeeks Q	**Critical**
HM- 09	Time Complexity	Class Recording Notes	-	**Critical**
HM- 10	Two Sum O(n) Optimisation	Class Recording Notes	LeetCode Q	**Core**
HM-11	SubArray xor==0	Class Recording Notes		**Core Bitwise XOR Concept**
HM-12	Isomorphic Strings	Class Recording	LeetCode Q	**Low**
HM-13	Dynamic Programming	Class Recording	LeetCode Q	**Medium**

	Best Time to Buy and Sell Stocks			
HM-14	Contains Duplicate + Group Anagrams ·	Class Recording	LeetCode Q LeetCode Q	**Core Concept**
HM-15	Happy Number [HashSet/Hash M ap]	Class Recording	LeetCode Q	**Medium**
HM-16	SubArrays K unique Distinct values	Class Recording	-	**Core + High Priority**

Module 4 : Two Pointers

Session	Content	Resources	Practice	Importance
TP-01	Intro + Two Pointers Template	**Class Recording**		**Core Concept**
TP-02	3Sum + Intersection of 2 Arrays	**Class Recording**	**LeetCode Q**	**Important**
TP-03	4Sum	**Class Recording**	**LeetCode Q**	**Medium / Low**
TP-04	Reverse Vowels of a String	**Class Recording**	**LeetCode Q**	**High**
TP-05	Is Subsequence	**Class Recording**	**LeetCode Q**	**High**

Module 5 - Stack

Session	Content	Resources	Practice	Importance
ST-01	Introduction to Stack	**Class Recording**	-	**Core Concept**
ST-02	Valid Parentheses [LeetCode]	**Class Recording**	Leetcode Q	**High**

Module 6 - Mathematical Programming

Session	Content	Resources	Practice	Importance
MC-1	Factors	**Class Recording** **Notes**	-	**Core Concept**
MC-2	Successive Calculations	**Class Recording** **Notes**	GeekforGeeks Q	**High**

Module 7 - LinkedList

Session	Content	Resources	Practice	Importance

LL-01	Intro to LinkedList	Class Recording		Core Concept
LL-02	Linked List Cycle	Class Recording	LeetCode Q	Extreme
LL-03	Sort List	Class Recording	LeetCode Q	Medium
LL-04	Middle of the Linked List	Class Recording	LeetCode Q	Medium
LL-05	Odd Even LinkedList	Class Recording	LeetCode Q	Medium
LL-06	Remove LinkedList Elements	Class Recording	LeetCode Q	Medium
LL-07	Delete the Middle Node of a Linked List	Class Recording	LeetCode Q	Medium
